HIMANSHU RAGHAV

Full Stack Software Engineer

Delhi, India • itsmeraghuvanshi@gmail.com • +91 9205606769 • LinkedIn • Portfolio

Professional Summary

Full-stack software engineer with 5+ years of experience building and shipping production web applications end-to-end — from database schema and REST APIs to responsive, accessible frontends. Production experience across React, Angular, Next.js, Node.js, TypeScript/JavaScript, PostgreSQL, MongoDB, Docker and AWS, delivering high-traffic public platforms, multilingual CMS-driven applications, and enterprise data systems.

Technical Skills

Frontend: JavaScript, TypeScript, React, Next.js, Angular, HTML5/CSS3, Responsive & Accessible UI
Backend: Node.js, Express, RESTful APIs, Python, Django, FastAPI, Flask, System Architecture, API Design
Database: PostgreSQL, MongoDB, SQL, Drizzle ORM
Cloud & DevOps: AWS (EC2, RDS), Docker, Kubernetes, Terraform, Vercel, CI/CD, Apache, Nginx, Linux
AI/ML: LLM API Integration
Practices & Tools: Agile, Git, Jira, Confluence

Professional Experience

Opalina Technologies *May 2023 – Present*
Software Engineer *Noida, India*

- Led full-stack development of **PushPolitics**, a Canadian civic engagement platform, owning system architecture, responsive React/Angular frontend components, Node.js REST APIs, and NationBuilder integration.
- Contributed to high-traffic national campaigns — **Pariksha Pe Charcha** and **Mann Ki Baat** — building scalable, event-driven workflows with real-time data handling and performance optimization.
- Developed and maintained full-stack features for the **Narendra Modi website and mobile application** (10M+ app downloads), delivering secure, responsive, multilingual experiences with dynamic CMS integration.
- Designed and built an **enterprise digital asset management platform** for audio, video and photo assets using Next.js, PostgreSQL and AWS (EC2/RDS), including database schema design, AI-assisted metadata generation, and a Docker-deployed, CDN-backed delivery pipeline.
- Delivered multiple CMS-powered microsites using reusable responsive components and fast-loading, maintainable backend architecture.

DXC Technology *Feb 2021 – May 2023*
Software Engineer *Noida, India*

- Delivered end-to-end software solutions in collaboration with cross-functional engineering and product teams.
- Built responsive web interfaces, backend services, databases and reusable REST APIs with a focus on performance, reliability and maintainability.
- Tested, debugged and upgraded production systems, improving functionality, responsiveness and cross-device compatibility in Agile delivery environments using Jira and Confluence.

Selected Projects

Enterprise Digital Asset Management Platform — *Next.js, PostgreSQL, AWS, Docker, AI/LLM Integration*

- Production system for organizing, searching and governing large media libraries end-to-end — database schema, access control, AI-assisted metadata generation, and a CDN-backed delivery pipeline.

GAN-Generated Fake Image Detection — *Deep Learning, Python*

- Built a frequency-spectrum and deep-learning approach for detecting GAN-generated images; experiments on ∼1,000 StyleGAN2-ADA images reported accuracy above 99%. Published in IEEE.

CCTV Camera Surveillance System — *OpenCV, Raspberry Pi, Python*

- Trained an ensemble-learning model integrated with OpenCV and a Raspberry Pi camera module for real-time surveillance.

Education

Amity University — B.Tech, Computer Science & Engineering 2017 – 2021 | CGPA: 7.57
